Shenzhen Mingpai Technology Co., Ltd

Zinc Stearate Technical Instructions(TDS)

Active ingredients	Zinc Stearate	Other ingredients	None
---------------------------	----------------------	--------------------------	-------------

Product introduction

This product is one of the most widely used additives in the plastics field. It serves primarily as a lubricant, but also as a densifying agent and a partitioning agent. It is used extensively in color concentrates as a dispersion aid. It is used to improve processing of the styrenics and ployesters, and to a lesser txtent with the olefins. In rubber applcations, it functions as an elastomer processing aid and release agent.

Product index

Items	appearance	free fatty acids	metal content	melting point	bulk density
Unit	——	%	%	°C	g/L
Index	white powder	≤0.50	11.0±0.3	129±5	≤360

Usage method

Package specification/ shelf life

20kg/ bag

Twelve months from the date of production. If the storage is expired, it can still be used after re inspection

Attention points

1. This product is flammable, avoid contact with fire	Flammability flammable
2. Keep away from non-polar oil to prevent its melting and deterioration	
3. Store in a well ventilated and dry place
